

The B.O.P. System

Barrows On Pallets

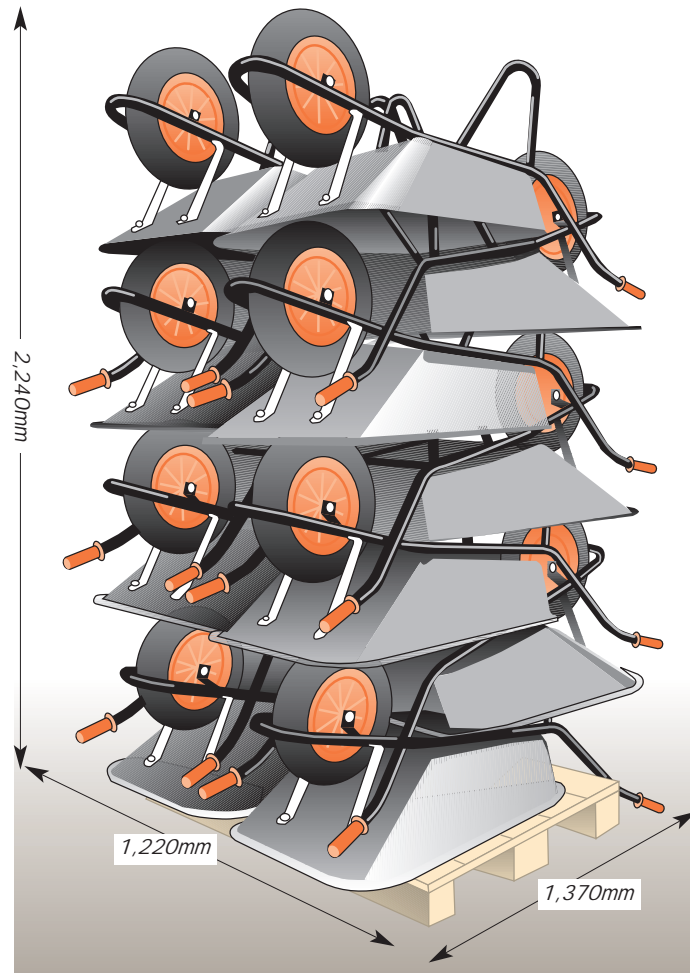

The B.O.P System is a revolution in the delivery, handling, storage and merchandising of wheelbarrows. This innovative system provides 14 fully assembled wheelbarrows, shrink wrapped onto a Euro-Pallet – an industry first.

The B.O.P. System

The B.O.P System is a unique method of handling and storing wheelbarrows. Specially designed for fork lift truck handling it reduces both hidden and indirect costs.

- reduced labour and time, with faster handling
- more efficient storage, using less floor space
- better control of stocks
- reduces health & safety risks with easy handling
- increased security
- extra packaging protects product quality in external conditions
- improved point-of-sale and merchandising
